Links

You can link complete blocks of text using the CMS system, however if you want to link words within a paragraph to another part of the site use the following code

The Text thet is to be linked

To add an email address within the text

The Text thet is to be linked i.e. lick here to email

Bold

To make **the tex**t bold
the text

Italic

To make *the text* italic
<i>the text</i>
Link

Colour

To change the colour of text you need to use website colour references in Hex format. This is a six digit code to represent the colour. See next page for simple colour guide. You must also spell colour COLOR. If you need a specific colour, but can't work out the code, send us a sample and we will use Photoshop to work out the code for you.

To make the text red
the text

Lists

To make an bullet pointed list

- Item one
- Item 2
- Item 3
- Item Etc

Item one

Item 2

Item 3

Item Etc

Combos

You can combine code as long as you open and close the brackets in the same order. Do not put spaces between the code elements.

To make **the text bold and** red

the text
